Friendship with Life in 21st Century

The only way to have a friend,
is to be one.

They say friends are the family you
choose.

BUT WHAT DOES FRIENDSHIP MEAN TO YOU?

Here's what friendship and life
means to us...

Thank You

Principal Ma'am

Vice Principal Ma'am

Meera Ma'am, Class Teacher

**And a big Thank You to all
Parents and Teachers**

EDITOR'S NOTE

It gives us immense pleasure to present our class magazine titled Filia.

All the students contributed their part, and it has turned out to be a complete team effort.

We are also pleased to say that we programmed this Magazine with our own HTML code, without any third party software.

We realise that we must cherish every moment of life, and to recollect these joyous memories, we, the students of IX A, decided to make this class magazine.

We wholeheartedly hope that you enjoy this symbol of teamwork of ours which shows a glimpse of how we perceive Friendship with Life in the 21st Century.

Thank You

TEACHER'S NOTE

Necessity is the mother of invention. Anything that is not found, is made. So if we do not find the happy life that we crave for, we make it! We make it with happy memories, joyful moments, beautiful thoughts and above all by gratitude, faith and trust! By being optimistic that everything fantastic is ahead of us! I congratulate all the students of Class IX A 2021-22 batch, who have come up with this terrific magazine of showcasing their ideas of ensuring Friendship with Life in the 21st Century, in their own unique and wonderous way! Kudos to you kiddos! You remind all of us that everyday is a new beginning. Let's take a deep breath and smile. Life is a fun-ride, waiting to be enjoyed!

QUOTES ON FRIENDSHIP

Friendship is always a sweet responsibility never an opportunity

- Khalil Gibran

A FRIEND IN NEED IS A FRIEND INDEED

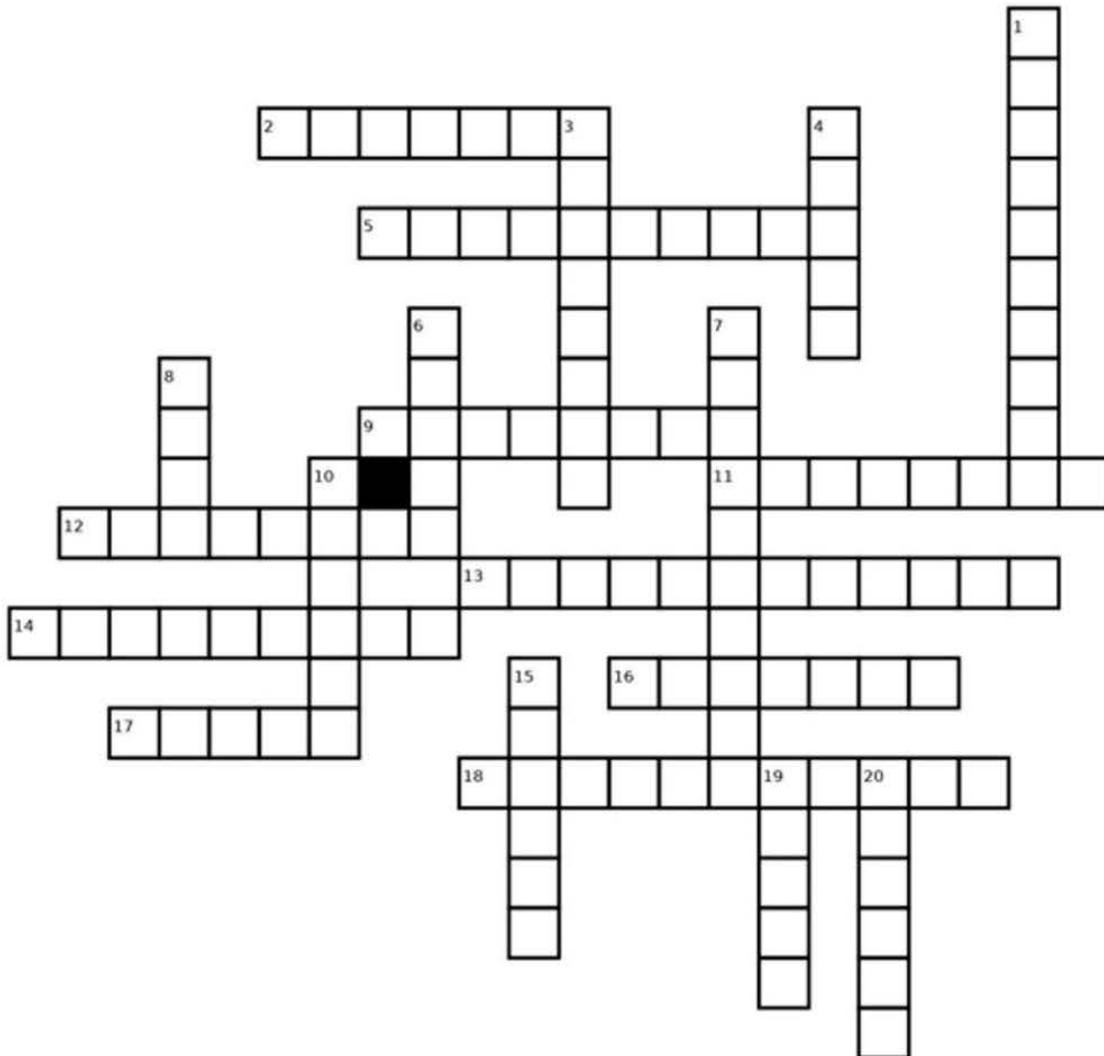

Things are never quite as scary when you've got a best friend

- Bill Watterson

A friend is someone who makes it easy to believe in yourself

- Heidi Wills

Crossword by Sidharth

Down:

1. She has won 2 Nobel Prize award in the field of physics and chemistry
3. Whose quote is this "Have no fear of perfection, you'll never reach it"
4. Another name for teacher
6. The most complex part of the human body
7. A action or inaction that is regulated to be in accordance with a particular system of governance
8. Largest organ in human body
10. Who made the laws of motion
15. Whose quote is this "Live as if you were to die tomorrow. Learn as if you were to live forever"
19. A dwarf planet in our solar system
20. Another name for help

Across:

2. Who is the author of invisible man
5. A video call app made by google, to chat everyone during this covid-19
9. A messaging app made by google
11. A machine that is used to play games and study nowadays
12. Whose quote is this "Imagination is more important than knowledge"
13. He has won 2 Nobel Prize award in the field of chemistry and peace
14. A set of conventional rules of personal behaviour in a social class, or a social group
16. People who are close to you
17. The second-largest natural satellite in the Solar System
18. The type of class which is going on during covid-19

Riddles

- 1. What is white when its dirty?**
- 2. What has four legs, but can't walk**
- 3. What type of dress can't be worn?**
- 4. What begins with an "e" and only contains one letter**
- 5. What has words, but never speaks?**

Answers :-

- 1. A blackboard**
- 2. A table**
- 3. Address**

- 4. Envelope**
- 5. A book**

A Small Leak wil Sink A Great Ship

Noffy and friends decided to participate in a music competition. Noffy plays the guitar, but he was very lazy and never practised. He said to his friends, "As you all practise well, the people won't notice my music." On the day of the competition, Noffy's bad tunes spoiled their song.

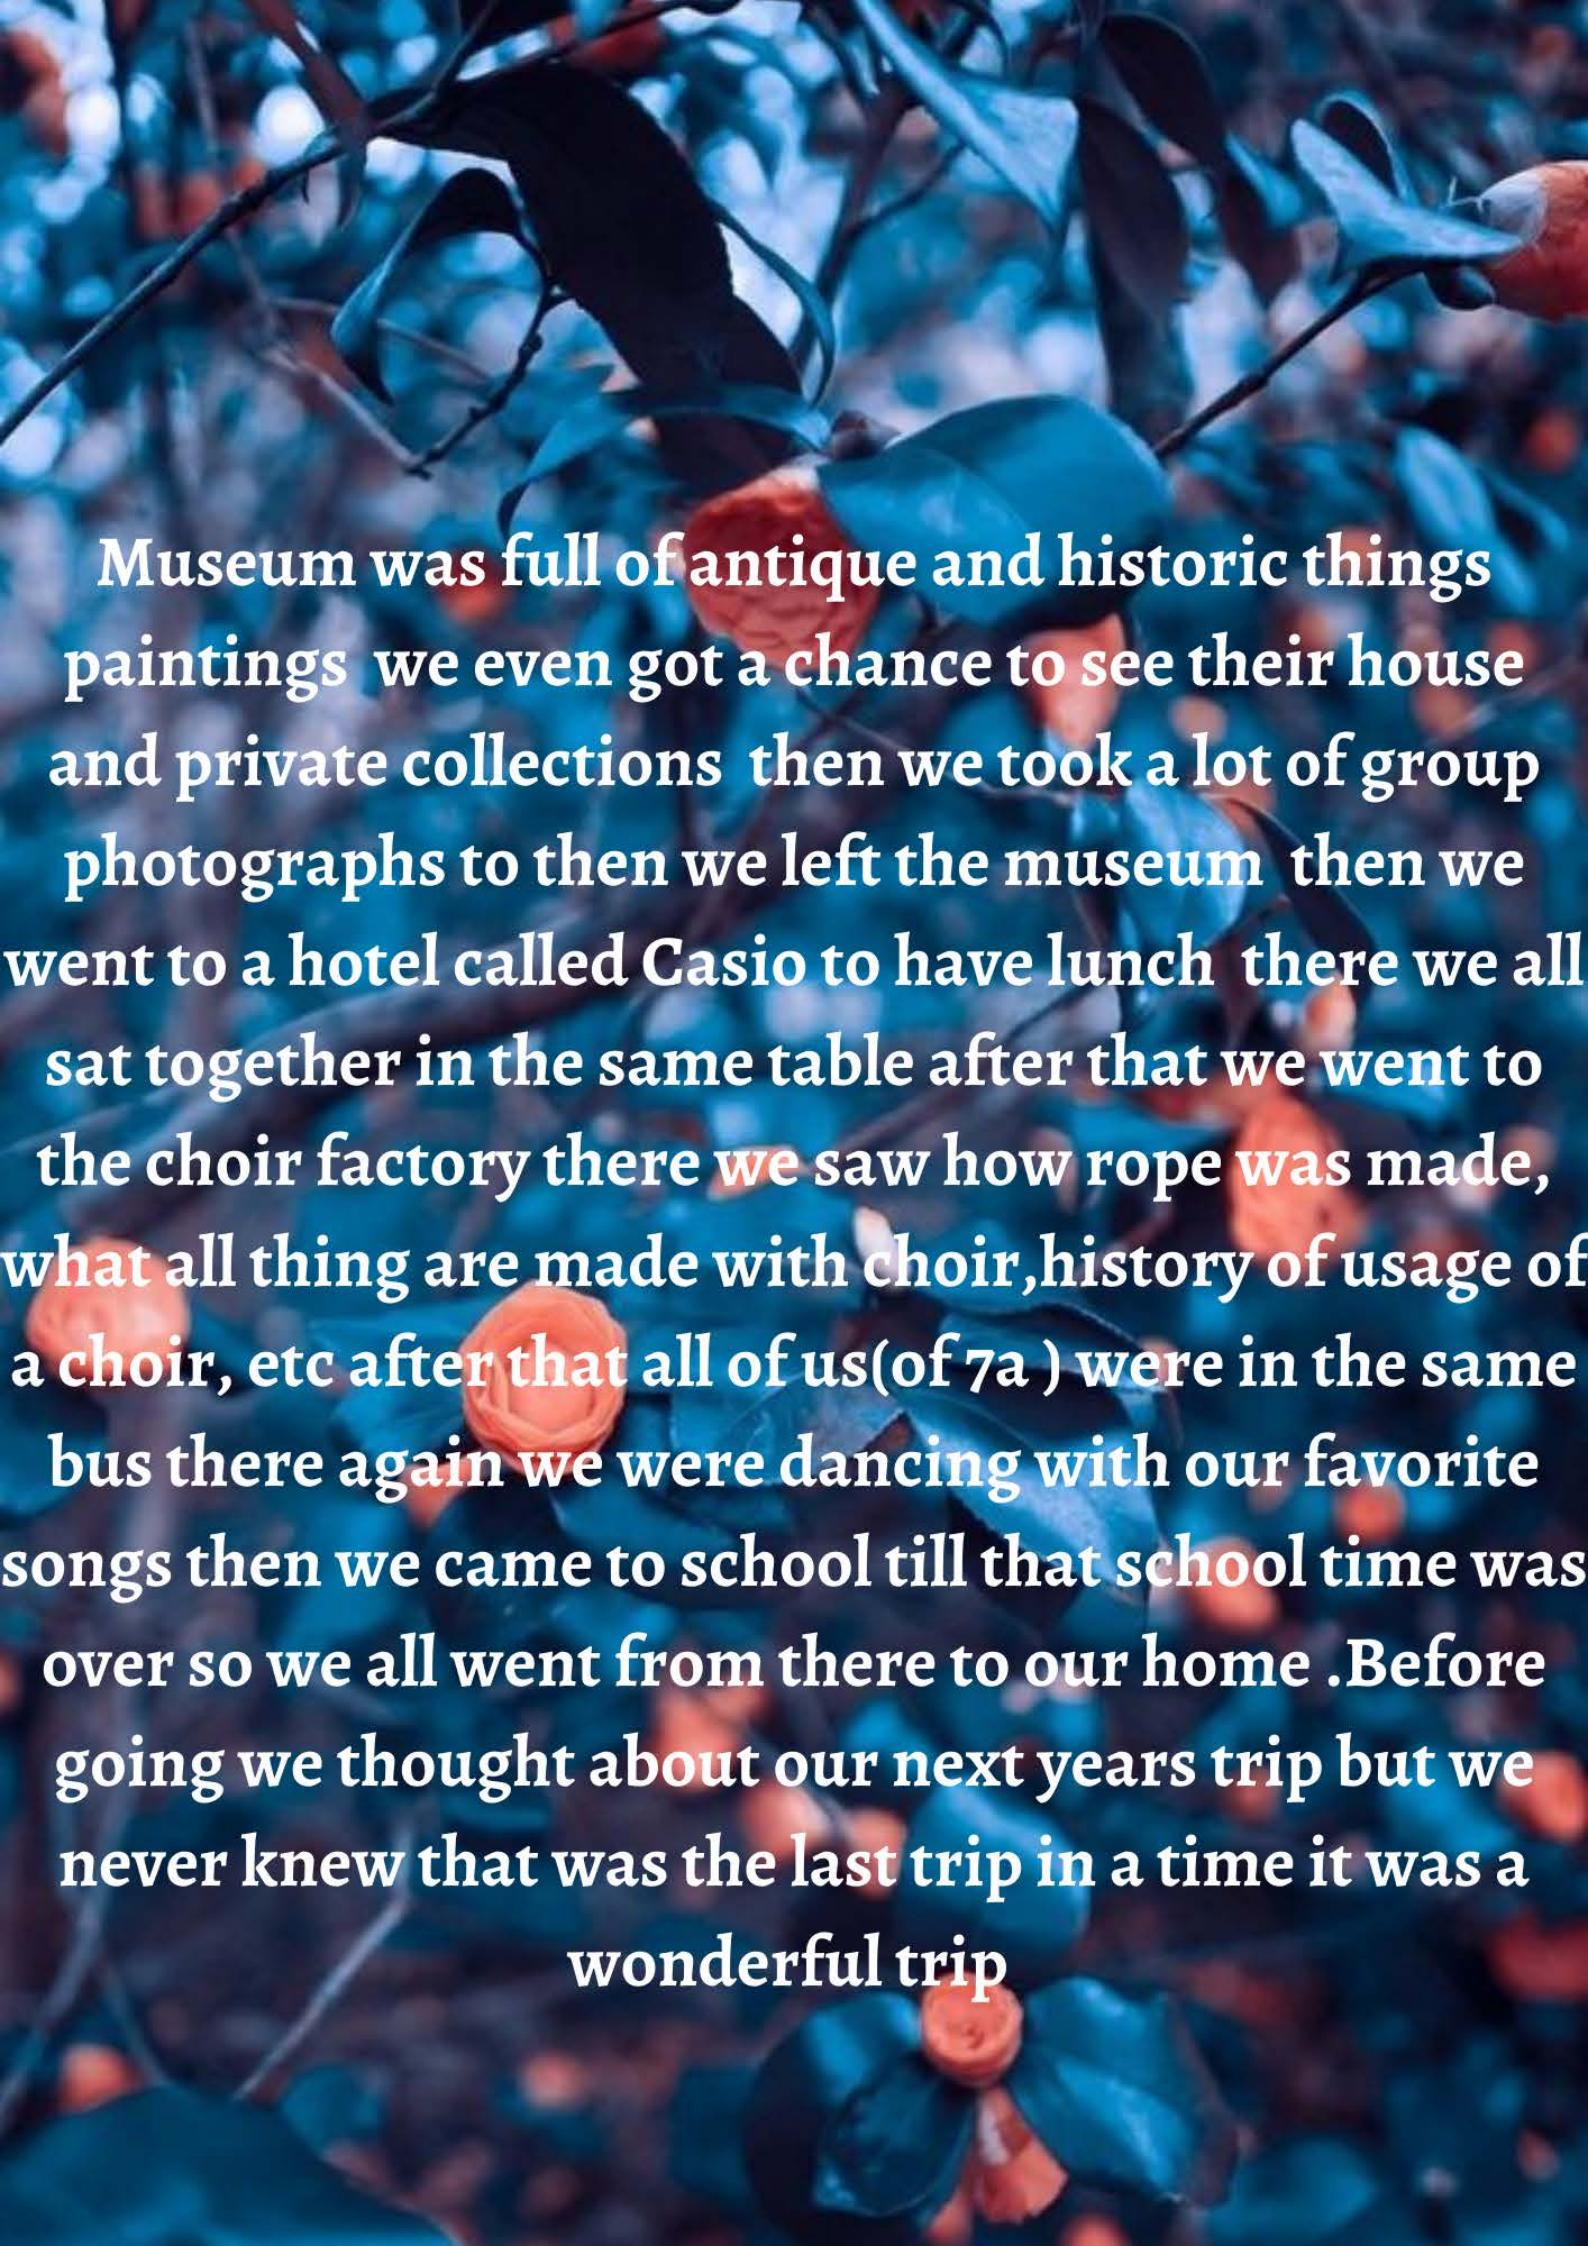

Moral - Everyone should work together for success.

Our Wonderful Trip

On November 29, 2019 we had a wonderful trip to the Alleppey coir factory and Revi Karunakaran Museum. It was a wonderful experience. In the morning we had to come to school first so we could go together from there. When I came to school I saw all my friends and teachers, our class teacher took attendance and we were standing together there we all were talking about our sunglasses then teachers ran into a problem(I was in 7a that time), from our class almost all students were there and other division students were less in number so some of us had to go another bus that included me and my best friends we were in a different bus it was a long trip in a bus we were dancing and singing we took many pictures with teachers phone. Then soon we reached our first destination, the Revi Karunakaran Memorial Museum where we joined back with our classmates.

Museum was full of antique and historic things paintings we even got a chance to see their house and private collections then we took a lot of group photographs to then we left the museum then we went to a hotel called Casio to have lunch there we all sat together in the same table after that we went to the choir factory there we saw how rope was made, what all thing are made with choir, history of usage of a choir, etc after that all of us(of 7a) were in the same bus there again we were dancing with our favorite songs then we came to school till that school time was over so we all went from there to our home .Before going we thought about our next years trip but we never knew that was the last trip in a time it was a wonderful trip

Arjun. S. Pai

ITS ALWAYS BETTER TO SPEAK FROM YOUR **HEART**...!

I always feel that it's better to speak from your heart rather than just following up someone or just to please others. Sometimes it may not sound good to others but I am sure that if your mind and heart together says that it will soon be alright then just go for it. Never think on for others rather think for yourself and be confident and sure about that. And I am sure that we cannot be always right, then make sure to try to listen to others words and rethink and if there is something wrong then always be ready to correct your sayings. Never mind if you were wrong then, as it is from mistakes that you learn. Like a truth is always bitter at first, our words may also sound bitter for others but sooner or later in their lives they would surely come to realize that after all it was for good.

By: Gayathri Praveen

HAPPINESS VS MATHEMATICS

ADD happiness in your life, that will **SUBTRACT** the sorrows from your life.

DIVIDE your happiness among others that will **MULTIPLY** the happiness within yourself.

**Make your life as an
ALGEBRAIC EQUATION
with
happiness as CONSTANT
and sorrows as
VARIABLES, where
happiness possesses the
highest
degree and sorrow the
degree zero.**

WHY DO I LIKE MY POSTMAN

It was a rainy day in Mumbai 10 years ago. I was a 4 year old studying in KG. Due to heavy rain, a holiday was declared for my school. Sitting at home I was looking at the fury of the rain and winds. “Ting tong”- the doorbell rang. As usual I ran towards our door. When I peeped through the grill, I saw a man in rain coat carrying one large bag in his shoulder. My mother followed me and she opened the door. The man smiled at us and handed over an envelope to my mom. This was the first time in my memory when I met a postman. From then onwards, I considered a postman as a friend who brings us happiness.

Later, when I grew up, there were several instances I saw a postman in our house bringing us letters, parcels and sometimes even money!!! My friendship and closeness with the postman got further reinforced. I always wondered how this guy knows every house in a locality. In the apartment where I live, we hardly know a few families that too in nearby flats only.

But the postman knows the occupants of all flats by their name!!! Not just one building, he know the names and addresses of people staying in all buildings in the area. In these times when we solely depend Google map for finding out a nearby address, a post man reaches anywhere and everywhere just by seeing the address. He braves the scorching sun, chilling winter and lashing rains to reach at all addresses as per the articles he carries every day and bring smile

to the people to whom they shall be delivered. What else is Godly than this? Now a days postman offers many more services than just delivering letters, articles and money orders. They collect letters for posting to other locations, they help people in withdrawing money from their bank accounts by carrying a Swipe machine with them etc. In an age when there is a huge population of elderly people staying alone in their houses, these kinds of services are really a blessing.

By availing the services of post man, the elderly people need not have to go out of their house to withdraw money from their bank account risking their health and safety. During the pandemic too the services of postman was not at all affected.

**It is but natural that people like a person
who serves many others without
expecting
anything in return. Postman falls in that
category and therefore no one can dislike
him.**

मित्रता

एक दूसरे के त्याग, प्रेम, विश्वास और चिंता पर मित्रता स्थापित होती है। एक प्रसिद्ध कहावत है। “ज़रूरत में दोस्त ही दोस्त होता है। इसका मतलब है कि समृद्धि के समय हमारे कई दोस्त हो सकते हैं, लेकिन कई लोग विपत्ति के समय हमें छोड़ देते हैं। हम अपने कठिन समय में एक मित्र की ईमानदारी की परीक्षा कर सकते हैं। मुसीबत के समय केवल एक ईमानदार और वफादार दोस्त ही हमारे साथ रहता है।

हमारी भारतीय पौराणिक कथाओं की लिपि में, हम सब्ची मित्रता के विभिन्न उदाहरण पा सकते हैं। हम सभी ने कृष्ण और सुदामा की कहानी सुनी है। सुदामा एक गरीब ब्राह्मण थे। उसकी हालत इतनी खराब हो गई थी कि वह अपने परिवार का भरण-पोषण नहीं कर पा रहा था। फिर उन्होंने अपने बचपन के दोस्त कृष्ण से मिलने द्वारका जाने का फैसला किया। जब वे द्वारका पहुंचे, तो उन्होंने द्वारपाल से अनुरोध किया कि उन्हें कृष्ण से मिलने दें। गंदे कपड़े से पहने होने के कारण द्वारपाल ने उसे अंदर नहीं जाने दिया। लेकिन, उसने कई बार अनुरोध किया और द्वारपाल से कृष्ण को सूचित करने के लिए कहा कि से।

उसका बचपन का दोस्त उससे मिलने आया है। अंत में, द्वारपाल ने उस पर दया की और कृष्ण को संदेश भेजा। सुदामा के आने की खबर सुनकर कृष्ण दौड़ते हुए आए और खुले दिल से उनका स्वागत किया। उसने उसे भरपूर धन देकर उसकी आर्थिक मदद भी की।

Science

&

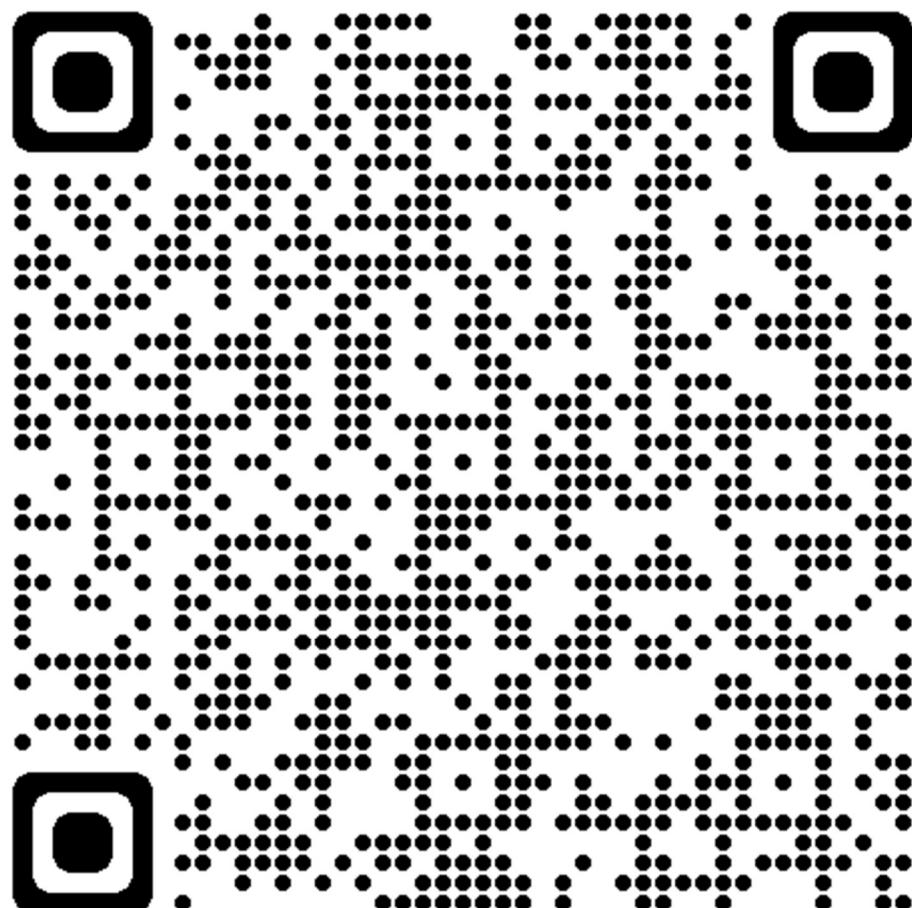

Technology

Magic Trick

This is a video made by Darshana Harikumar, presenting a magic trick using Science.

[Click here](#)

TECHNOLOGY

Technology is Our Part of Life

Technology has changed our day-to-day life. Those days have gone when only the rich could afford the luxuries. Due to the growth of globalization and liberalization, all the luxuries are within the reach of a common man. Today, an average middle-class family can afford a television, washing machine, refrigerator, computer, Internet, etc. At the touch of a switch, a man can witness any event that is happening in far-off places.

Advancement of Technology

Technology has reduced the effort and time and increased the efficiency of the production requirement in every field. It has made our life easy, comfortable, healthy, and enjoyable. It has brought a revolution in transport and communication. The advancement of technology along with science has helped us to become self-reliant in all spheres of life.

Technology in Education

Technology is making education improve over time. With technology, students and parents have a variety of learning tools at their fingertips. Teachers can coordinate with classrooms across the world and share their ideas and resources online. Students can get immediate access to an abundance of good information on the Internet. Teachers and students can access plenty of resources available on the web and utilize them for their project work, research, etc. Online learning has changed our perception of education.

Disadvantages of Technology

Even though technology has increased the productivity of the individuals, organizations, and the nation, it has not increased the efficiency of the machines. Machines do not have the ability to plan and think beyond the instructions that are fed into their system. Technology alone is not enough for progress and prosperity. Management is required and management is the human-act. Technology is largely dependent on human intervention.

SIDHARTH S . NAIR

RACHEL CARSON

MAY 27, 1907 – APRIL 14, 1964

Rachel Louise Carson was an American marine biologist, author, and conservationist whose influential book Silent Spring (1962) and other writings are credited with advancing the global environmental movement. she was born onon a family farm near Springdale, Pennsylvania.

Carson attended Springdale's small school through tenth grade, then completed high school in nearby Parnassus, Pennsylvania, graduating in 1925. After her first year of graduate school, Carson became a part-time student, taking an assistantship in Raymond Pearl's laboratory. She earned a master's degree in zoology in June 1932.

Sitting for the civil service exam, she outscored all other applicants and, in 1936, became the second woman hired by the Bureau of Fisheries for a full-time professional position, as a junior aquatic biologist. She spoke as much as she was physically able, however, including a notable appearance on The Today Show and speeches at several dinners held in her honor. In late 1963, she received a flurry of awards and honors:

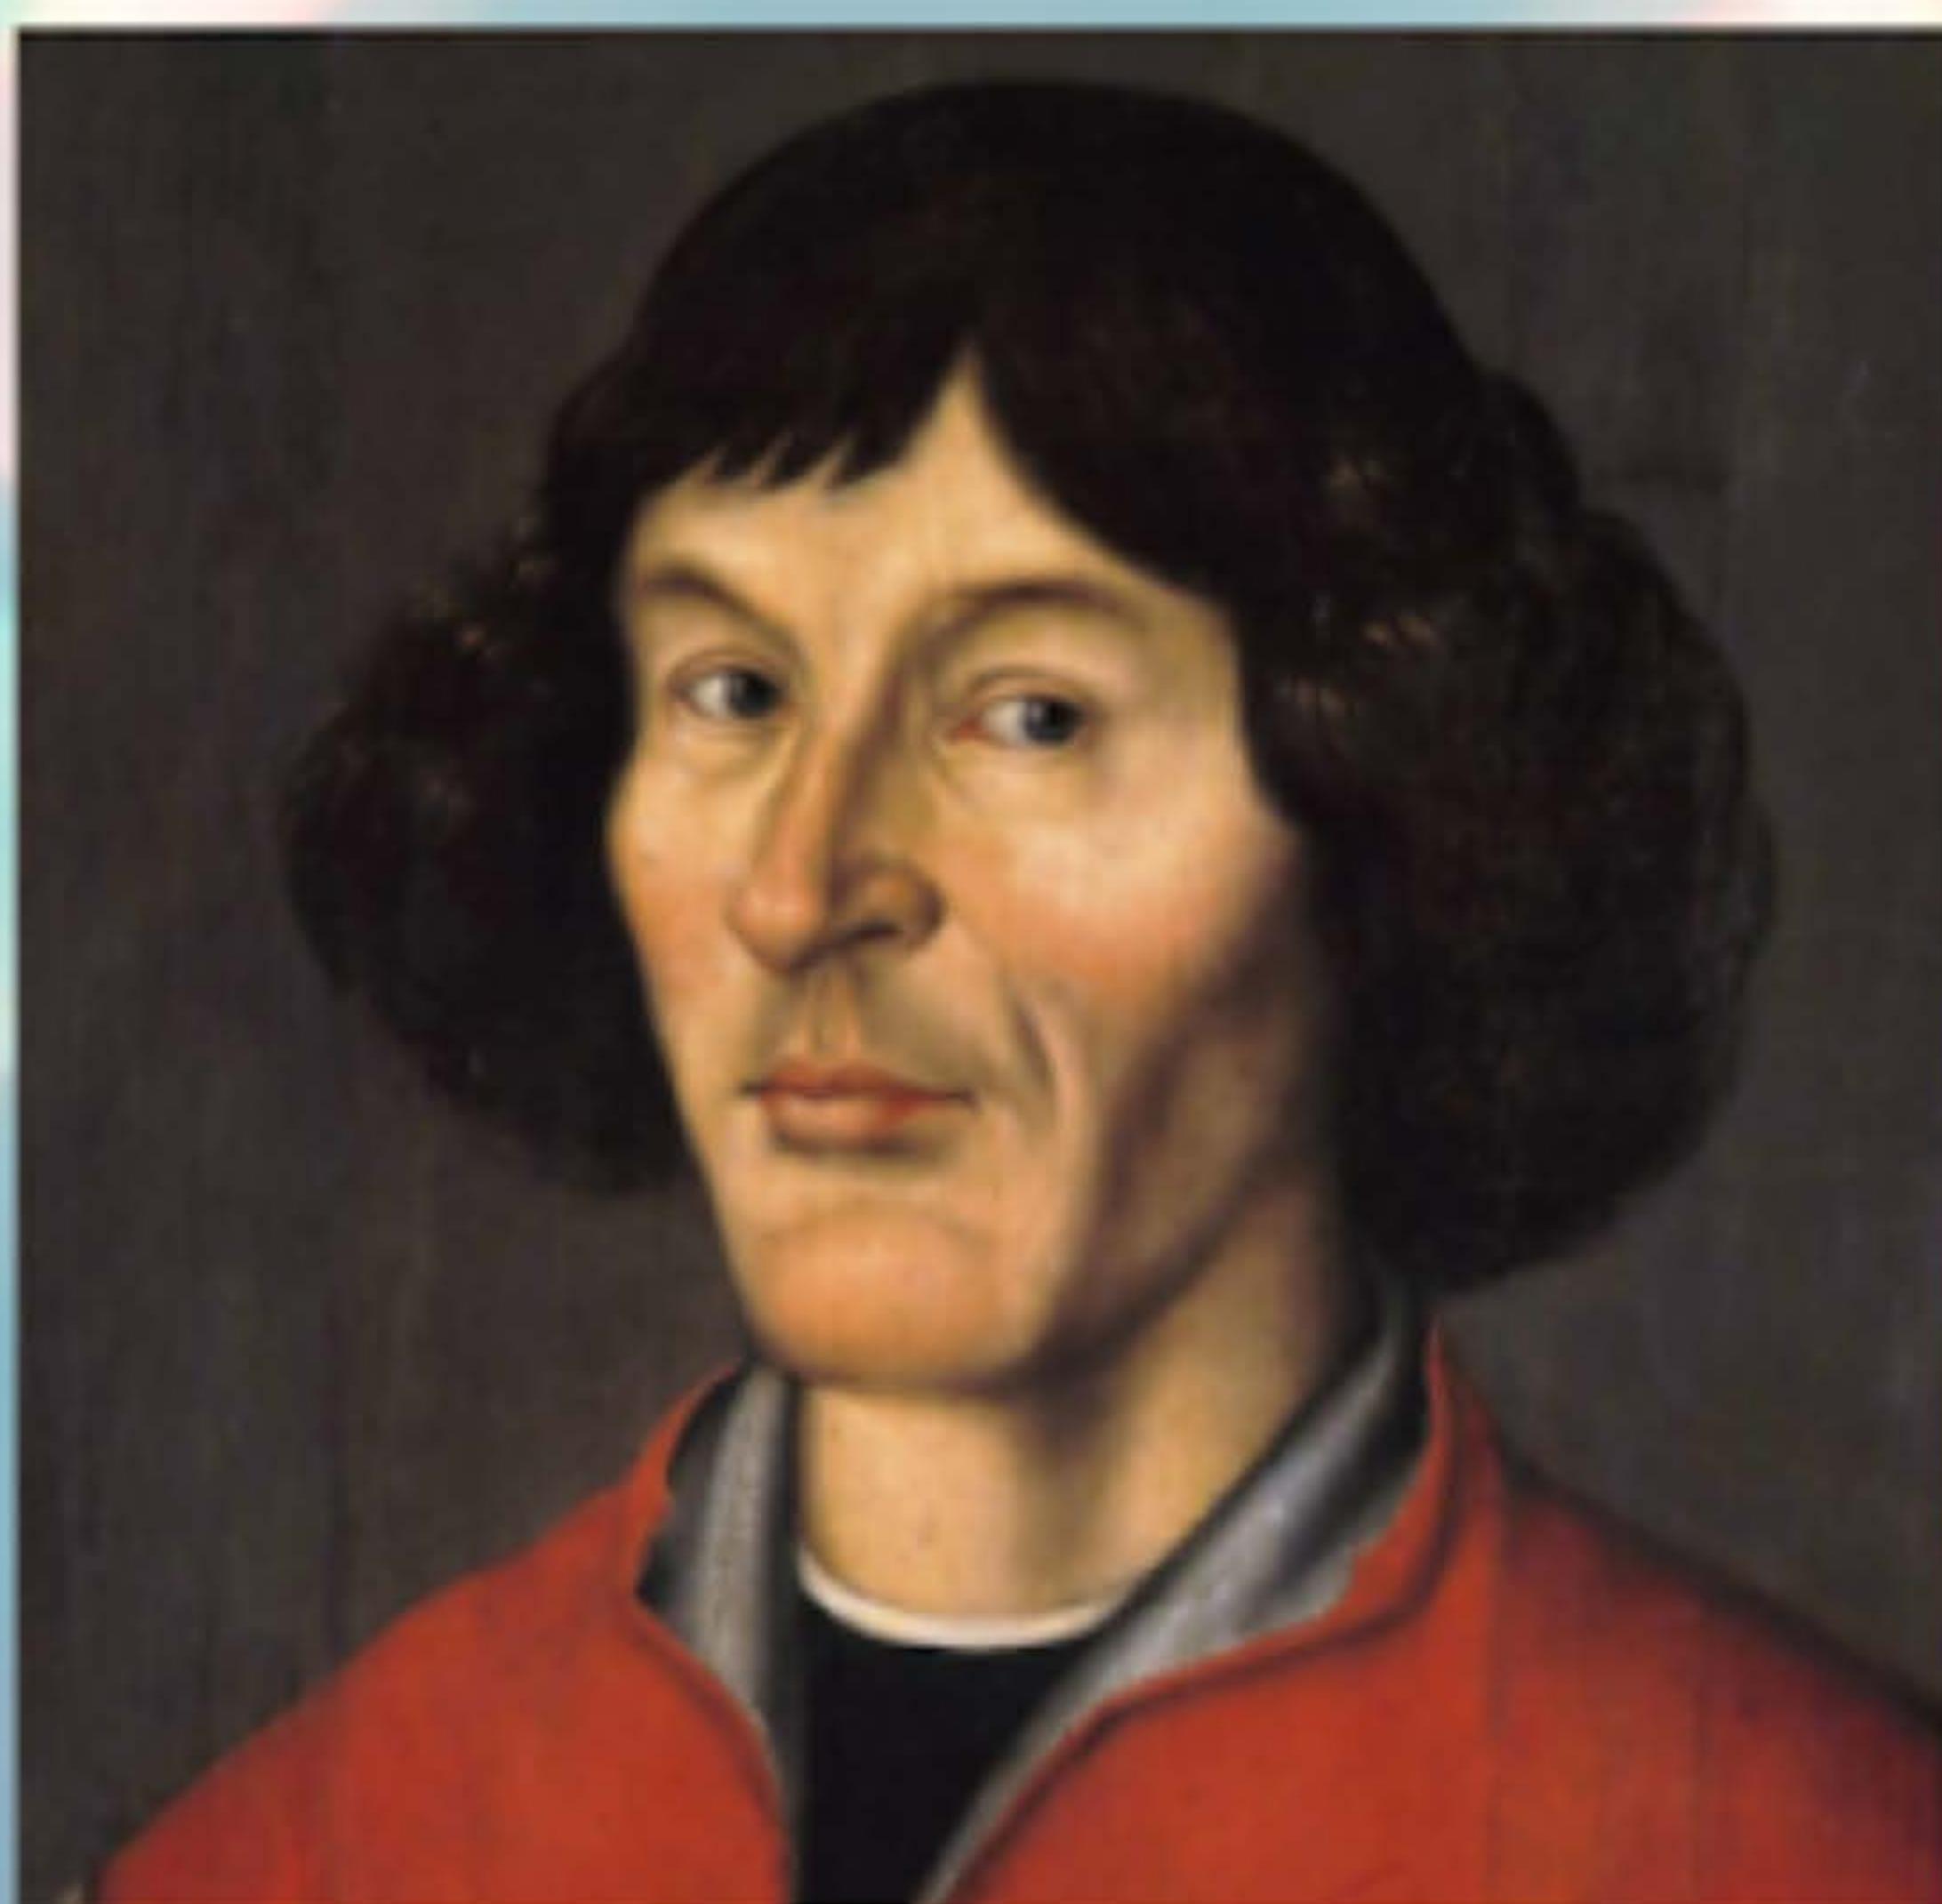

the Audubon Medal (from the National Audubon Society), the Cullum Geographical Medal (from the American Geographical Society), and induction into the American Academy of Arts and Letters. Though Carson received hundreds of other speaking invitations, she could not accept the great majority of them. Her health was steadily declining as her cancer outpaced the radiation therapy, with only brief periods of remission. She died of a heart attack on April 14, 1964, in her home in Silver Spring, Maryland. The best seller book of rachel carson 'The Sea Around Us' won her a U.S. national book award.

ASHIKA MENON

NICOLAUS COPERNICUS

Nicolaus Copernicus was born on
19 February 1473 in the city of
Toruń (Thorn), in the province of
Royal Prussia, in the Crown of the
Kingdom of Poland.

This time he studied at the University of Padua, famous as a seat of medical learning, and—except for a brief visit to Ferrara in May–June 1503 to pass examinations for, and receive, his doctorate in canon law—he remained at Padua from fall 1501 to summer 1503. Nicolas was known as the father of modern astronomy. He was the first modern European scientist to propose that Earth and other planets revolve around the sun, or the Heliocentric Theory of the universe. Nicolaus Copernicus (1473–1543) changed how educated human beings viewed the world by constructing the heliocentric theory of Earth's relation to our Sun. ...

This heliocentric theory replaced the Ptolemaic geocentric theory, which held that the Sun and other planets revolve around Earth. Toward the close of 1542, Copernicus was seized with apoplexy and paralysis, and he died at age 70 on 24 May 1543.

- NAKUL RAGESH

Marie Curie

Marie curie was a woman who dedicated her life to invent radium and polonium
Madame Marie Curie was born on 7 November 1867 in Poland and became a great physicist and chemist. in 1903 she was the first woman to win the Nobel prize 1911 she became the first to win 2 Nobel Prizes in 2 different sciences, physics and chemistry

Under her direction, the world's first studies were conducted into the treatment of neoplasms by the use of radioactive isotopes. In 1920 she founded the Curie Institute in Paris, and in 1932 the Curie Institute in Warsaw; both remain major centres of medical research. During World War I she developed mobile radiography units to provide X-ray services to field hospitals.

Her achievements include the development of the theory of radioactivity tensions for insulation of radioactive isotopes and discovered two elements, polonium and radium. She passed away in 1934 in America

While a French citizen, Marie Curie, who used both surnames, never lost her sense of Polish identity. She taught her daughters the Polish language and took them on visits to Poland. She named the first chemical element she discovered polonium, after her native country.

Entities that have been named in her honour include:

The curie (symbol Ci), a unit of radioactivity, is named in honour of her and Pierre Curie (although the commission which agreed on the name never clearly stated whether the standard was named after Pierre, Marie or both of them) the element with atomic number 96 was named curium. Three radioactive minerals are also named after the Curies: curie, sklodowskite, and cuprosklodowskite. In 2007, a metro station in Paris was renamed to honour both of the Curies

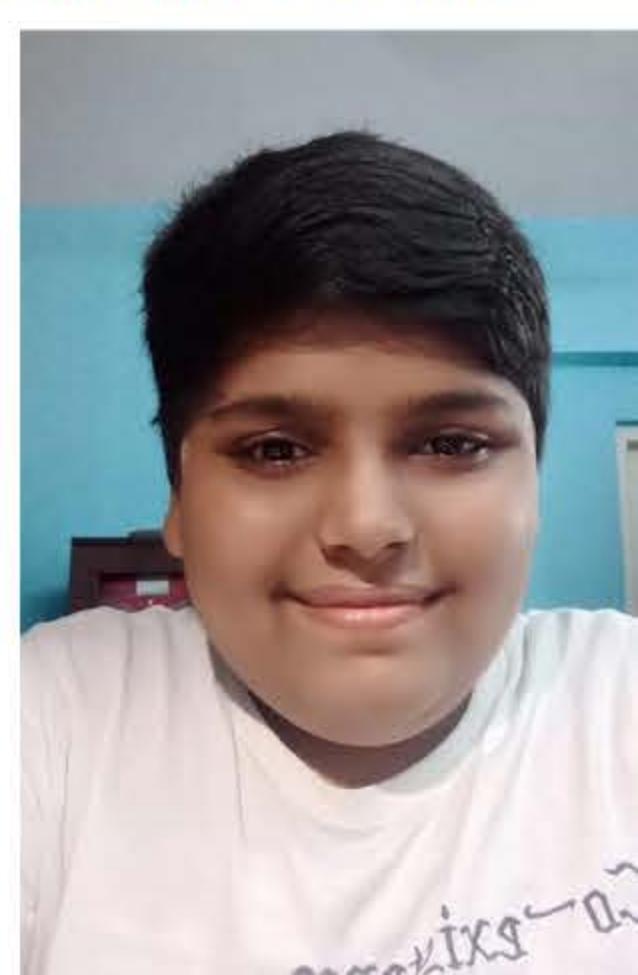

The Polish nuclear research reactor Maria is named after her. The 7000 Curie asteroid is also named after her. In 2011, a new Warsaw bridge over the Vistula River was named in her honour.

In January 2020, Sate logic, a high-resolution Earth observation imaging and analytics company, launched a NuSat type micro-satellite; NuSat 8, also known as Marie, was named in her honour

Today we have lights in our home because of her she scarified her whole life for science

A Fight for Nothing

Once, there lived two friends, Ram and Amit. They were the best of friends,

and also played Football together. One day, an inter-school football match was announced and the squad for the match was being selected. But Ram was chosen as the captain of their class, instead of Amit. Amit was disappointed, and started thinking that Ram was better than him. Ram's team also won the match.

Amit's sadness turned into jealousy and he stopped talking to Ram. Ram, was heartbroken that his best friend, whom he had known for years, was not talking to him, since the Football match. A few days later, another football match was announced. Since the first match had been won under Ram's captaincy, Ram was made the captain for this match also. But Ram had other thoughts, and pretended to have an injury.

He spoke to the coach about his injury, and asked the coach to field Amit over him. Even though the coach was doubtful, he soon gave in, and Amit was made captain. The match turned out to be a victory for Amit's team. All the students of their class started making fun of Amit because even though Amit

was not talking to Ram, Ram had recommended his best friend. Amit started feeling sorry, and apologised to Ram. Thus, Ram's clever strategy worked, and they became friends again.

- Abhinav S

True friendship

Friendship means understanding not agreement..friendship is the hardest thing in the world to explain...it's not something you learn in schoolbut if u haven't learnt the meaning of friendship you haven't learnt anything
